Do you love numbers?

Do you like solving puzzles?

Does symmetry please your eyes?

Do you like math games?

If Yes, then you should join the Fun Math Club!

For the parent: The Fun Math Club “Numbers and Geometry” class will be offered at Casa di Mir in the Fall 2017 and is targeted for 4th – 6th grade students (and invited 3rd grade students). The class focuses on teaching and exercising skills to solve problems using reasoning and logic. Lessons are presented using hands-on, engaging activities such as puzzles, games, magic, and art. Students’ in-class work is collected into portfolios and weekly updates of each class’s topics will be sent to parents via email.

Fun Math Club founder Yul Inn will be the instructor for this class. He has offered math enrichment programs to schools and community organizations in the San Jose area since 2003. He has been an instructor in the Johns Hopkins University Center for Talented Youth summer programs and the Stanford University Pre-Collegiate Studies Summer Institutes since 2005. He also has hosted math nights at local schools and led math circles at Stanford and San Jose State.
